Why Sonata Software

- Deep understanding and product engineering heritage with expertise in software engineering

- Has a history of executing 360 degree relationships with some of the largest ISV customers

- Has experience of cloud modernizing several ISV solutions including sonata's own vertical and horizontal platforms.

Challenges

- The enterprise sought modernization of multiple ERP products on its legacy platforms

- The enterprise was faced with budget and timeline constraints

- Company wanted a partner who understands modernization of products in cloud and can build knowledge to create frameworks to modernize all their product portfolio.

Solution

- Sonata Software provided advisory services and defined the digital roadmap for the enterprise

- It modernized UX using a hybrid cloud solution and also acted as integration partner for backend systems to enable a seamless experience

- Sonata Software's services and solutions spanned strategy, design, integration, testing, and ongoing maintenance. It also leverages predictive and prescriptive analytics to future proof requirements

Benefits

- Saved of 30% on budgeted estimate and speed of delivery

- Sonata added several reusable frameworks to help speeding up further modernizations.

- Sonata provides extended support on an on-going basis to the enterprise
