

SONATA SOFTWARE

AUTOMATION CASE STUDY

In Good Health

Sonata's test automation services make the difference to this healthcare giant

Client Overview

This American healthcare multinational started off in the late 19th century, making surgical supplies and household products. This Fortune 500 company is organized into three business segments: Consumer Health, Pharmaceutical and Medical Devices. As one of the largest healthcare companies, in the world, it spends a significant amount of money on research and development - \$ 14.7 billion in FY 2021 alone.

Revenue \$94.9 B	260+ operating companies across 60+ Countries
Manufacturing units 100+	Employees 140,000

The Pressure Points

The client was using over 800 applications across multiple geographies. These included several mission critical applications. They were looking for bringing in business agility by adopting Test Automation and DevOps.

Solutions

Sonata implemented a phased approach to Test Automation. This was aimed at helping the client identify process and application-related bottlenecks, identifying capacity limits, ensuring scalability, and finding and fixing issues early and improve overall user experience.

Functional testing	Platform testing	Server Management Tool Upgrade
Data Migration	Application Retirement	

Results that Speak Volumes

By The Numbers

Annual cost savings of over \$2 M	Projects in delivering 4800+ Scripts 700+	Servers managed 70+
Major upgrades with 0 downtime 4	Applications tested 800+	Improvements in response time and scalability 70%
