# Empowering **Microsoft Clients** with **Next-Gen Business Intelligence** Solutions by Sonata

Helping enterprises convert data to business intelligence effectively with Power BI

The difference between simply having data and being truly data-driven is the ability to translate raw numbers into actionable insights. Enterprises are increasingly looking to maximize the value of their data, and Microsoft Power BI stands out as a platform that helps unlock that potential.

But leveraging Power BI to its full extent requires more than just technical expertise – it requires a deep understanding of the business challenges and the ability to integrate advanced analytics seamlessly into day-to-day operations.

That's where Sonata, **a trusted Microsoft Gold Partner** with over 30 years of partnership, can make all the difference. We have the expertise, methodologies, and proven track record to help you implement Power BI seamlessly and unleash the full transformative power of data-driven insights across your organization.

## **Power BI** Implementations by Sonata: A Proven Track Record

### Leading Tech Giant
**15+ years of Data & BI Platform**

Migrated 1000+ reports from SSRS to Power BI, and standardized 300+ reports with common UX templates within 3 months.

### Food and Beverage Company
**Field Service Optimization**

Migrated from Oracle DWH to Azure; integrated field service dashboards enhanced operational efficiency.

### Global Fragrance House
**BI Modernization**

B2B Order Processing and CXO Dashboards. Reduced production lead time from 21 days to 5 days using advanced features.

### Audio Equipment & Music Technology Company
**Data platform – Integration Bus**

Implemented a data platform with Integration Bus and streamlined data pipelines, optimizing music files for instruments through Power BI.

Leading FMCG Giant
**Data Platform Modernization**

Seamlessly migrated reports from Tableau to Power BI, enabling more accurate demand forecasting.

A MLM Lifestyle Company
**Migration and Report Factory**

Migrated reports from Tableau to Power BI with our report factory model.

# Sonata's **BI Modernization Approach**

Sonata's BI Modernization Approach ensures a seamless migration to Power BI that maximizes business value at every step:

**Assessment & Planning**

Analyze current environments, define migration goals, and develop a detailed modernization plan.

**Environment Setup**

Configure the BI environment, establish data connections, and set up necessary tools for migration.

**Migration Execution**

Smooth data extraction, transformation, and migration to Power BI, along with the recreation of existing reports and dashboards.

**Testing & Validation**

Comprehensive testing for functionality, performance, and user acceptance.

**Cutover & Go-Live**

Implement a detailed cutover plan for a smooth transition to the new BI platform as the primary platform.

# Sonata's **BI & Reporting Factory Model**

Sonata's Global BI & Reporting Factory Model delivers proven value-reducing report costs, enhancing accuracy, and accelerating time-to-market.

With an integrated service center offering **E2E BI and analytics**, we deploy scalable teams of SMEs, BI architects, developers, and QA specialists. Our streamlined processes, rigorous quality assurance, and repeatable frameworks, powered by **advanced BI tools and automation,** ensure efficient and impactful results.
